9. Season and Weather:	
10. Date Last Sprayed:	11. Flowering Plants Nearby:

Sampling Instructions

Choose 10 plants at regular intervals along two diagonal transects across the plot. Examine the plants closely for pests, diseases and farmers' friends.

Name(s) of Pest(s)/Disease(s) seen	Total number of pests seen or number of diseased plants (None, few, moderate, many)	Damage caused (None, light, medium, heavy)	Part of plant damaged

Name(s) of Farmers' Friend(s) seen	Number seen in 10 plants (actual number)

Collect two examples of each type of pest, disease and farmers' friend and place each type in a separate tube for later identification

Diagnosis of plot problems

Recommendations for action
